

## SCCISP Blockchain Apps Security

---

### Smart Cities and Critical Infrastructure Professional (SCCISP)

---

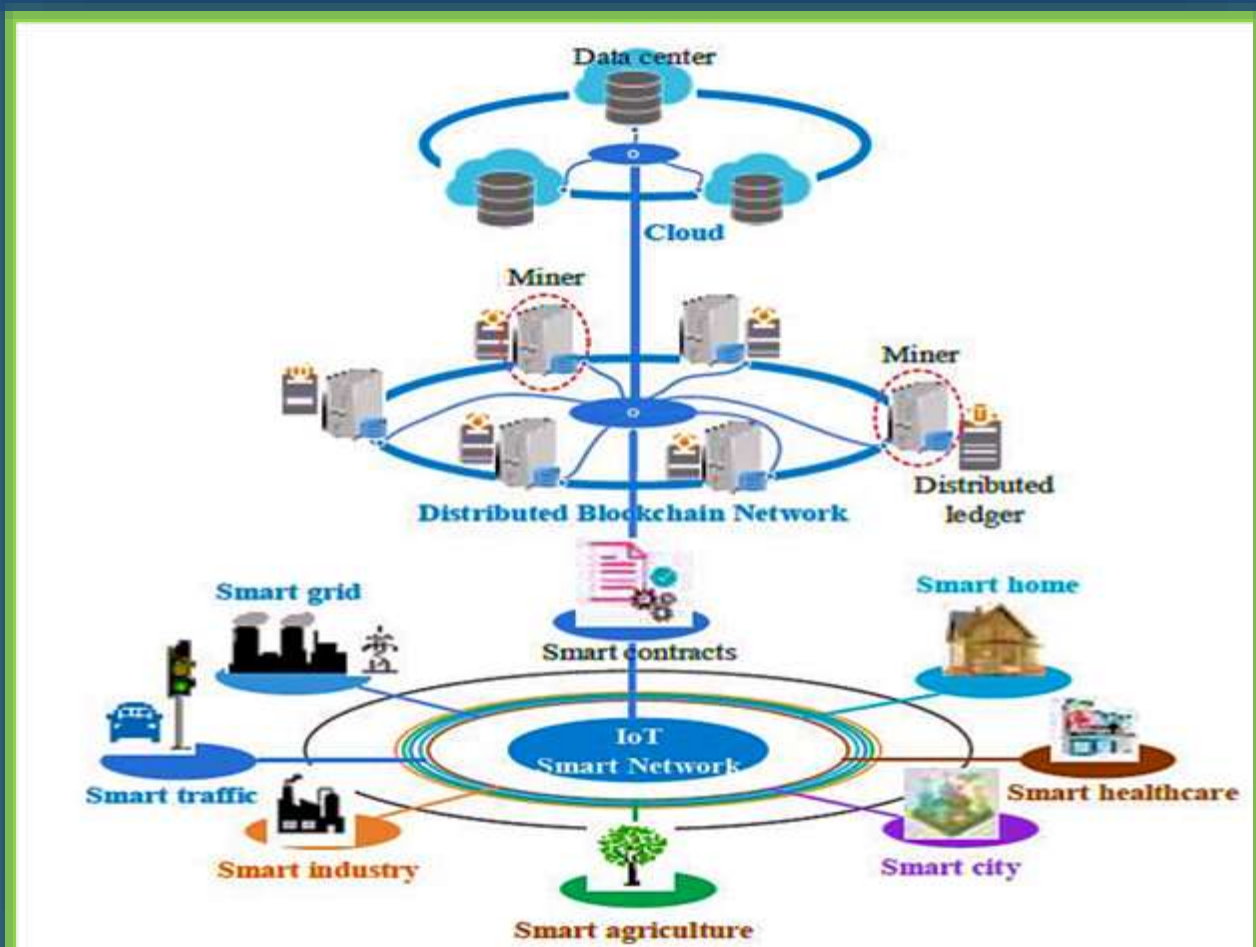

- The SCCISP Blockchain Apps course is an IoT Security Institute course offering an industry recognized career pathway for Cyber professionals requiring the skills to address security challenges within Blockchain eco-systems.
  - Completing the SCCISP Blockchain Apps Security course provides the candidate with the skills to securely design, implement and manage Security controls and services.
  - Unlike the SCCISP Foundation certification the SCCISP Blockchain Apps Security course does not require a minimum of 5 years' experience within the cyber industry prior to undertaking the certification. The SCCISP Blockchain Apps Security is an ideal course for those seeking to develop the necessary cyber security skills applicable to Blockchain Apps technologies.

## AN INDUSTRY DRIVEN CYBER CERTIFICATION PROGRAM

The SCCISP Blockchain Apps Security has been developed for the next generation of emerging Cyber Professionals. The Blockchain Apps Security course provides individuals with the necessary skillset to address cyber security challenges within the the Blockchain industry. Industry and Government sectors are seeking trained cyber professionals with the necessary skills to address emerging smart cyber security challenges. Get you Career on track today! The SCCISP Blockchain Apps Security course provides a module-based approach to course delivery and content learning.

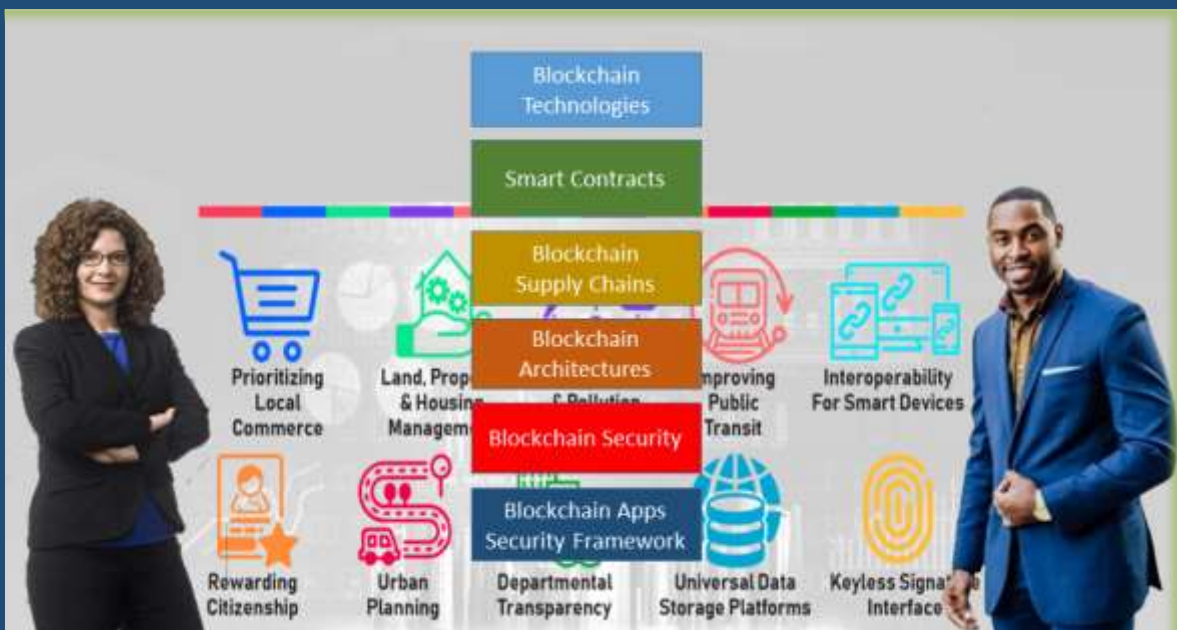

## HOW THE COURSE IS STRUCTURED

The SCCISP course comprises a mixture of video presentations, reading material, quizzes and assignment based activities. Students are required to complete all modules and associated activities to be successful in their SCCISP studies.

This Industry based approach to cyber security challenges ensures employers and industry professionals that SCCISP professionals have the broad range of skills, both practical and academic that extend beyond traditional security certification.

These skills incorporate the unique challenges facing Blockchain Apps Security services delivery and enablement.

## WHAT WILL I GAIN FROM THE COURSE?

The SCCISP Blockchain Apps Security student is trained to deliver these complex security skillsets. To achieve this, the SCCISP requires training not simply in cyber security controls, but requires the necessary skills to articulate these controls and their importance throughout the design and build process. Maintaining channels of communication between a new set of stakeholders and industry professionals.
