

# SCCISP MARITIME

---

## Smart Cities and Critical Infrastructure Professional (SCCISP)

---

- The SCCISP Maritime course is an IoT Security Institute course offering an industry recognized career pathway for cyber professionals requiring the skills to develop within the Maritime security sector.
  - Completing the SCCISP Maritime course provides the candidate with the skills to securely design, implement and manage Security controls and services. In addition, the SCCISP Maritime provides cyber professionals with the skills to address "smart world" cyber challenges.
  - Unlike the SCCISP Foundation certification the SCCISP Maritime course does not require a minimum of 5 years' experience within the cyber industry prior to undertaking the certification. The SCCISP Maritime is an ideal course for those seeking to pursue or further develop a career in maritime security.
-

## AN INDUSTRY DRIVEN CYBER CERTIFICATION PROGRAM

The SCCISP Maritime has been developed for the next generation of Cyber Security Professionals.

The Maritime course provides individuals with the necessary skillset to address cyber security challenges within the Maritime industry.

Industry and Government sectors are seeking trained cyber professionals with the necessary skills to address emerging smart cyber security challenges. Get your Career on track today!

The SCCISP Maritime course provides a module-based approach to course delivery and content learning.

In addition, critical to the delivery of the SCCISP Maritime courseware is the inclusion of the Smart Cities and Critical Infrastructure Framework as a training module.

Unlike other certification programs, the SCCISP integrates the global released IoT Security Institute Framework into its training modules. This allows SCCISP Maritime students to learn the methodologies and processes in deploying security controls and processes whilst utilizing an industry recognized framework.

This academic and deployment based methodology provides security professionals with the necessary training and tools to deploy security best practices by design, at all stages and levels of a Maritime Eco-System.

## HOW THE COURSE IS STRUCTURED

The SCCISP Maritime course comprises a mixture of video presentations, reading material, quizzes and assignment-based activities. Students are required to complete all modules and associated activities to be successful in their SCCISP Maritime studies.

This Industry based approach to maritime cyber security challenges ensures employers and industry professionals that SCCISP Maritime professionals have the broad range of skills, both practical and academic that extend beyond traditional security certification.

These skills incorporate the unique challenges facing maritime security service delivery and enablement. Ships, Ports and supporting services are working spaces, information portals and transport information exchanges that require appropriate security controls to meet their future potential.

---

## WHAT WILL I GAIN FROM THE COURSE?

The SCCISP Maritime student is trained to deliver complex security skillsets. To achieve this, the student requires training not simply in cyber security controls, but requires the necessary skills to articulate these controls and their importance throughout the design and build process. Maintaining channels of communication between a new set of stakeholders and industry professionals.
